The TRIO counselors were some of the biggest contributors to my success at WCC. For one, they introduced me to the TRIO Program. They also helped me transition into a student worker for TRIO and helped me with my classes.

---

DSPS, Shawn Lanear, and two of my classmates

---

Helping me to learn the basics of college and helping me to get to transfer

---

Class flexibility, enthusiastic professors

---

Laney in EOPS was a huge help to me and Todd Sasano was my favorite psych teacher

---

The outreach campuses

---

Getting all the help from the counseling department

---

The opportunities that this college has given me whether through financial aid and student support

---

Trio and eops helps with any question.

---

Personal drive and support from instructors

---

The biggest contributors to my success at woodland community college were Laney from EOPS and professor Jennifer McCabe. They were able to make me feel motivated, hopeful and comfortable to keep pursuing my education.

---

Time management and learning to improve my skills for online learning/education.

---

EOPS helped me to success

---

I just take same class there

---

The ability to manage a lenient schedule that accommodated my work load with my school work, and having the ability to not have to work if I did not need to which allowed me to get ahead when I could. But a lot of the professor's that I took boosted up my ability to take in the material.

---

Receiving two associate's degrees and being able to transfer to Sacramento State.

---

Not miss a semester.

---

Communication

---

My parents and high school counselors support

---

Eops

---

I believe this biggest contributor was the EOPS program as well as my counselor Araceli Ruiz.

---

strong advice from councilers and open labs. food programs were a welcomed plus.

---

Isabel Duenas and Aracely Ruiz.

---

The Biggest contributor was Neli from TRIO. She was my first mentor at WCC. She always puched me and helped me stay motivated.

---

EOPS definitely played a significant role in my success at WCC. Without Laney or Edwin, I wouldn't have known which direction to go or what to do. They were always happy to help, making me feel comfortable and valued.

---

Announcements helped a lot, they helped keep me up to date and would let me know about any due dates

---

Some of my biggest contributors to my success include with Lorell Cooke, who was my advisor and the main person who made my transition from Oregon to California as smooth as possible. I also want to thank EOPS and DSPS for listening to my needs and working with my to ensure that I am successful in my academic career.

---

Utilizing the WCC programs available for me. DSPS, EOPS program counselor and tutoring offered.

---

Finding the department that was the right fit for me helped. I wanted to have a place where I felt I was doing the most for our world and for me that was in the agricultural department.

---

The counseling department, super helpful and understanding

---

When I began my journey to return to school after being in the workforce for 10+ years, my initial meeting with the counselor was extremely encouraging. After taking some courses and realizing my dream of wanting to become a Nurse, I felt extremely encouraged by Dr. Shah. His classes are not easy or is the material that he needed to teach, but I always felt that he completely supported my success and he see's his student's success as his own. His availability and openness were crucial to my success, through his support of after hours conversation to SI & TEAS prep time. I am thankful to have him as one of my professors.

---

The Staff of Woodland Community College has some of the best, most caring people in the world. Every person that I had the opportunity to work with expressed their love, devotion, and commitment to helping a student be successful. I cannot tell you how many times I was lifted up and placed back on track by those who wanted me to succeed as much or even more than I did.

---

Guidance from my counselor.

---

one of the biggest contributors to help me succeed in WCC is I can learn the basics on what a college setting is supposed to be and now I learned a-lot about what to do in college.

---

---

What were some of the biggest challenges you faced while completing your degree or certificate? ⓘ

Some of the biggest challenges I faced while completing my degree were managing my time and all the different things I had to do, this includes things in my personal life.

Different counselors told me different classes were required to transfer to different universities. Note takers weren't available for me through DSPS

Being worried about failure and needed support for understanding the situation

Pandemic

Coming to college on campus was difficult for me. I really love online classes

None

Full time mom and full time job

Gettin used to online classes and how they're schedule worked out.

Trasferencia and fasfa help

Covid

The biggest challenges were definitely my internal conflicts and relationships with loved ones.

There were many obstacles that I faced during my entire career here at WCC. But as time went on and the bulk of my credits had already been completed years ago, having one class at a time really helped me focus on one course. Math was always and is a big challenge for me but STATS 1 taught me to be focused and having a good professor helped me tremendously.

Doing school online was a struggle

Time because the Covid-19 happened

Lack of motivation, aimlessness, covid, and bouts of self-doubt and depression. School-wise, there were issues with my student account which did not allow me to register early when I could, or having classes that stated I did not complete the prerequisite.

Being in school during the pandemic was a difficult challenge at first, but over time I became used to the online classes.

Working full time.

Counselours

Brandi amus

My biggest challenge was not knowing what path to follow, I began with agriculture to find out I wanted to study communications to then switch to psychology.

time and transport to classes. ability to grasp college level math.

Applying for financial aid.

---

The biggest challenge was finding in person classes that fit my schedule with work.

---

One issue I had was that sometimes there was only one class and one professor available for some of the courses I needed to take. If that particular professor didn't get great reviews, I was stuck with them, making the course a lot tougher.

---

Biggest challenges I faced included keeping up with dates and communicating with my counselors.

---

Some of the biggest challenges that I faced while completing my degrees and certificate were: going back to school in the middle of a global pandemic, losing my father to lung cancer, being pregnant, working an "essential job" that was 50 hours a week, and eventually having to leave my job so that I could stay home with my son while I finish school.

---

Biggest challenges were completing a degree and working full time while providing for my 4 kids, and being a single parent. Especially during the Pandemic.

---

I feel that I needed more guidance and without that it took me longer than two years to finish a two-year degree.

---

Probably having to find the right school for me and transfer from another JC to this school

---

Well, of course COVID had its limitations, but I always felt like I had multiple support systems on campus and off. In regards to challenges, I would have liked to have more food options available on campus, this semester has been difficult, as I spend most of my days on campus Tues/Thurs and would have loved to had an opportunity to stay on campus and work through lunch.

---

As an older student I faced a curriculum that I had never been exposed to that much younger students had already completed. It is quiet the experience when you are in an Ethnic Studies class, and you were a part of that history. It was the experience of a lifetime.

---

The transition to online due to the pandemic.

---

the biggest challenges I faced is that I would get worried if I get treated well as a student in the college and if i get support based on my learning disabilities such as having autism.

---

g

---

My experience at WCC could have been improved by having teachers understanding online learning better. That includes organizing information and homework better on Canvas to make it easier for students to complete assignments and not get confused.

---

Note takers

---

N/A

---

Better communication regarding resources available

---

More online classes and photography classes

---

More professors

---

My planning skills

---

Some of the professors could've handled situations better and they also could've been more understanding.

---

When I join I was still in high school with no understanding of which classes would benefit me on the long run. I would have love a better planning.

---

I don't have any real ideas except for that I wish I could have taken more in person classes

---

I don't think anything could have improved my experience at Woodland community college. I had a great 3 years of experience, lessons and accomplishments.

---

I do not have any improvements at this time.

---

The are nice and understand

---

I truly enjoy the college, and maybe the only thing that could improve my experience would be availability of necessary classes. I understand that community colleges have seen a big drop in students and that affects the college's funds to offer classes, but sometimes schedules are tight and when a major class is only offered once per semester and it's not available it does cause issues, but that's probably the hardest problem to deal with in a "post-covid" educational system.

---

---

N/A

---

Canvas

---

better communication with admissions, counselors, and dean of school and being able to take more classes as a high school student.

---

It was great

---

I think if I would've applied myself like I did this past year I would have finished faster.

---

the change in format for english could have saved me time and I may have taken more degree specific classes.

---

More Social Events

---

More social events in the evening.

---

I would like to see more variety when it comes to majors, especially in the arts category.

---

After attending some events that were hosted I got more of the feeling this was my school rather than just a school.

---

One way that my experience at Woodland Community College that could have been improved is having been able to go in person.

---

My last semester at WCC my semester courses were changed without me knowing before semester started in Fall. The reasoning WCC was because of Pandemic, and online courses. This affected my schedule and courses taken, thenot later another course was added after a certain date in order to transfer to Sacramento State. This resulted in never being able to transfer

---

My experience could have been improved if I had had better advisement and guidance throughout my time there. I wish that the counseling department would have been more knowledgeable and that they would have been on the same page as one another.

---

Everything was perfect

---

none

---

I believe that if I had a better understanding of financial aid, and how units mattered I would have been a bit better off early in my academic career.

New students should definitely get involved as much as possible and take advantage of the resources available to them. Chances are, they won't regret it, and will gain tons of new knowledge, make great connections, and make some happy memories.

---

Go to every class and don't be afraid to ask questions or ask for help

---

If you don't feel ready for four year college or don't have enough money for pay. Go to community college for saving

---

Introduce yourself to fellow students and your professors, don't be afraid to interact with other and become part of this community

---

Keep it up and don't take hard classes at the very end

---

Stay organized

---

Never give up,,, there's always help

---

always take your time with courses, do not compare your progress to that of other students and ask for help when you need it

---

Always ask for help!

---

Look which classes would benefit with different areas.

---

Get to know your professors and foster those relationships

---

The advice I would give them is to stay on top of things. I know that whatever conflicts I had going on at home would stress me out but just knowing I had completed all assignments and registration helped take some if that stress off enough to help me have a clearer state of mind.

---

Be patient, use the resources that are offered.

---

It good college and easy professor

---

If they do not need to rely on working to get through school, then do not work. I have worked 40+ hours and have taken 15 units and it is incredibly draining, and potentially demotivating. Open up with people and classmates and really try to help others and with enough effort many people will help back. Don't be afraid of talking to professionals about mental health because it can save you.

---

Join programs, TRiO was a program that helped me finish school and be able to transfer.

---

Stay organized and don't give up even if that means taking fewer classes a semester.

---

Be informed of all benefits that WCC offers

---

Be sure to give yourself plenty of time to study and do your best

---

Stay in contact with your counselors

---

Advise I give to future students, "whatever you do do not stop trying, even when you think other people are doing better than you."

---

do mathe and english first then your science to get requirments out of the way.

---

Put yourself out there, step out of your comfort zone and doors will begin to open.

---

Always use the resources that are provided.

---

Take advantage of the resources available to you!

---

Be involved with the campus. Make sure you know the school's map and locations. And try to come to events that are hosted by the school.

---

I would advise new students to talk with their counselor at least 2 times per semester so that one is prepared for any sort of changes regarding degree progression.

---

Never give up, and utilize time management each week. Use the tutoring services offered at WCC each week when needed. This will play a major role in getting your homework done on time and high test scores.

---

Speak to many people about their educational journey and to find a faculty member who can be a mentor and an advocate for them. The faculty seem to know more about the path the students need to take to achieve their goals more than the counseling department does.

---

Stay focused don't stress over the small stuff and reach out to your counselors

---

Always give 100% effort, and reach out at anytime if you are struggling. From the professors, to the folks in counseling, to the financial aid staff, they all have your best interest in mind and the focus is on you and your success. Cliche, but the only stupid question is the one you don't ask. So ask away!!!

---

If your not sure what you want to do in the future, work on your core course work while you decide. Also, advocate for yourself. You know you better than anyone else and you deserve the best.

---

Use your resources. Join clubs, programs, and be in touch with your counselor often.

---

I would advice to new students for who feel they don't want to go to a four year university yet because of family or issues i recommend do WCC

Thank you for a great experience!

No

Thank you to all my teachers for the Unconditional support

None

Na

I have been coming on and off since 2014, and I feel that this semester has been one of the strongest and most impactful yet. I still have another year, but I'm dying to see how the school improves upon itself.

I have been very happy. Thank you

Do Eops.

Want to thank Isabel Duenas and Aracely Ruiz for being there for me whenever I had any questions about the transfer process and obtaining multiple degrees all within 2 years. Go Eagles!!!

I'm going to miss WCC very much, it took me along time but everyone at WCC played apart in my success and graduating. Thank you very much.

I know that WCC is a continuously maturing institution, but I would like it to be more focused on the students' needs and on innovative ways of teaching rather than on just existing.

Two or so years ago, I was extremely nervous about going back to school. But now reflecting on my time spent at WCC, I am so glad I took that initial step, it has given me the confidence and knowledge to become a lifelong learner. Thank you to all for your support!

Thank you Woodland and Yuba Community College instructors, staff, and students we are the village.
